

Field Representative News

Attention all Field Representatives: Spread the word!

It has come to my attention lately that Field Representatives in the field speak of this being a slow time of year. Their phones aren't ringing much. There isn't much going on..... Well this may be true but you as a field representative have the ability to turn this around. How? Well how is very easy. The more information you put out, the more people will contact you and reach to you for help. You have to put yourself and your Field group out in the public eye. Draw attention to yourself.

So the next question is how do I make this happen. You can start with good administration of handling the people who have reached to you already. Did you get them referred and selected to a center? Were they financially qualified? If they weren't did you get them the government hot line or the Samhsa website? Did you do everything with that person that was possible. As a field representative you can also sell books or recommend books that we can sell them here at Narconon Arrowhead. Such as the *Helping Someone Overcome Addiction* Extension course for only \$35.00. It is always a good idea after a few weeks or so to re-contact people who initially weren't able to come to the program. Things change. What a person couldn't do before, they maybe able to do now.

We are also working on ways to help you as a field representative be able to promote yourself and your groups by providing you with free information DVDs, information packs, tri-fold flyers and so on that you can attach your business card and mail them out to prospective clients. We are in the process of creating post cards that you will be able to add your information to, have printed at local printer and then mail out. These cards were created in black and white to keep your cost down and to help you be able to promote yourself. Obtaining a mailing list is easy to do. You can buy them on line, you can create them by down loading addresses from on line, or you can contact your local post office to find out how to do mass mailings cheaply. The post office is more then willing to help.

You have the ability to Promote, Promote, Promote. All you have to do is take the first step to get started. You don't have to have a website to be a great Field Representative. All you need is the wanting to help people and make it happen.

Narconon Arrowhead Success Story

I was struggling with drugs for ten years. I was addicted to marijuana, cocaine and alcohol. By age 11 I was smoking marijuana and a heavy drinker by age 21. I tried cocaine for the first time at 21 and by the time I was 25 I was addicted to crack cocaine. I still managed to function while I was using drugs though.

The whole time I was killing myself. It was a slow process and without visual effects on my body. Once I started smoking crack my life was no longer manageable. I became a person who cared about nothing but the drug. I managed to stay alive long enough to loose everything that meant anything to me. That included my family, my morals, my beliefs, my belongings, pride and most importantly my ambition to succeed in life. I was robbing my family blind and managed to find myself in jail for the first time at age 22.

I managed to ruin everything I came in contact with. The effects that smoking crack had on my life was at the least, devastating. I had two felony charges by the age of 26 and numerous misdemeanor charges. Those misdemeanor charges included two DWI's. I managed to make it through several rehabs for alcohol and drug abuse. I was spiritually and mentally drained by the age of 31. I tried moving away to no avail, and I tried locking myself in my house for weeks at a time because I couldn't get away from the cravings of the cocaine.

I found out about *Narconon*[®] after I finally ran out of places to hide and went to my family for help. I locked myself up in a hotel and I was at the end of my rope.

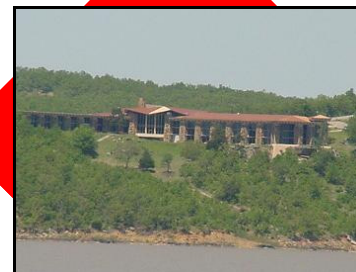

Nothing mattered to me except finding someone or something to relieve me of the misery I had been living in for 10 years. My family immediately took action to help me. It wasn't even a day and they had found out about Narconon.

I came to Narconon on Feb. 13 2003. It was the best decision I have ever made. I finished the program in three months and I have never been more motivated to live life just the way it was meant to be. Narconon has given me purpose in my life. The staff at Narconon has been a home and more importantly, a family to my new existence and me. I have learned to stand up to the demons that haunted me before and I have learned to face any situation head on and without reservation.

I owe Narconon and the staff more than I can ever repay in a lifetime. They have given me back the motivation to obtain all that was lost in my addiction. Thank you Narconon and all the wonderful people who were and are involved with this organization.

R.H. Narconon Graduate

*"I owe
Narconon and
the staff more
than I can ever
repay..."*

Field Representative Win of the Month

I have a client with a son in the program doing very well, his cousin hears about it and talks to his aunt (MOM of the son in the facility) they get together talk to the cousins parents who are not very happy with him and out of communication with the aunt for many reasons over the years. Now everyone had to put all the garbage aside and work on the cousin who was in jail. Then go to the State attorney General to get him out. They worked together to find the money to pay the program fees and WOW we have two members of the same family in the same facility at the same time. Both doing very well.

Delivering a new, proven approach to drug rehabilitation and prevention.

Introducing the Drug-Free Alliance

The fight against alcohol and drug addiction has taken on a much different meaning in recent years with the onslaught of prescription drug abuse in America. Never has it been more important to educate people in our society about the dangers of all drugs as it is now, when there are more than 23 million people in need of help.

The Drug-Free Alliance is an initiative of the Foundation for Social Improvement and is a grassroots movement designed to raise awareness of the harmful substances in our communities, both legal and illicit, as well as combat the negative influences of pro-drug groups. The Alliance supports drug-free living through education and prevention along with drug-free policy and rehabilitation. Of course this means that the Alliance is very much a supporter of the Narconon Program, being the most effective rehabilitation and education program in the country.

Your help is needed. Join the Drug-Free Alliance by visiting www.drug-freealliance.org and making your presence and voice known by taking action to support a drug-free society.
